

Hand operated

Easy to operate, lightweight, manual machines for the bending of thin sheet material. The machines comes with three types of top prisms for different profiles. MFH-S type has been designed with a segmental rail for manufacturing boxes and special profiles. The lower section can be removed for ease of transportation and for mounting on a bench. A radius bar cannot be supplied for this type of machine. MFH-H type for manufacture of high ducts and narrow profiles MFH-L type for standard bending and because of the low prism it is also suitable for U profiles and Z profiles.

Stock no	208370106	208370205	208370304
Type	MFH-S	MFH-H	MFH-L
Working length	mm 650	650	650
Max plate thickness (400 N/mm ²)	mm 1.5	1.8	2.0
Bending angle	93°	93°	135°
Opening between the prisms	mm 42	35	38
Length	mm 860	860	860
Width	mm 510	510	510
Height	mm 1070	1040	1000
Discharge springs	-	-	-
Weight	kg 78	69	65

Hand/foot operated

Powerful, well dimensioned machines specially designed for professional use. A compact, fully welded design of extremely high quality, where the emphasis is primarily on simple, ergonomically correct handling and minimal maintenance. Designed with foot operated tightening for the top prism, allowing a particularly simple and rapid procedure that frees up both hands for adjusting the bend material. There are 25 mm recesses on the sides of the top, bottom and bend prism used for bending profiles with sides bent upwards. Relief springs are standard for weight equalisation of the folding beam, which guarantees perfect and trouble free folding. The models have segmented sharp rails for folding box sections up to a maximum edge height of 68 mm. Supplied as standard with a 15 mm feed bar.

Stock no	208380105	208380204
Working length	mm 1020	1270
Max plate thickness (400 N/mm ²)	mm 2.5	2.0
